

# AV VIEWER VIDEO PLAYBACK

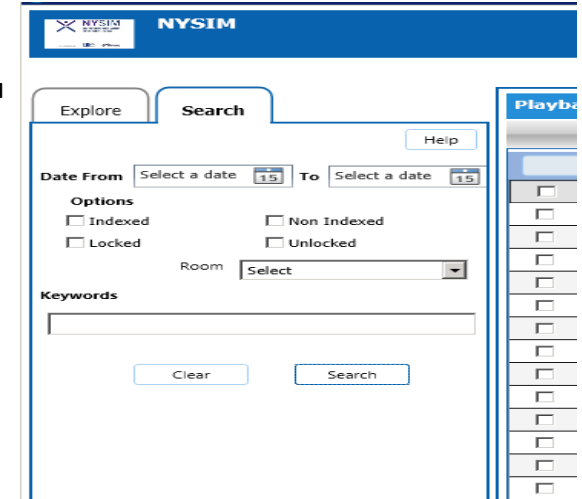

1) In the **Search Tab**, enter in a **From and To Date** and leave all Options unchecked.

\*\*You will want to make the search as narrow as possible. If you know the exact date of the video you are looking for, please use this for both the From and To fields:

Example: From 1/1/2014 to 1/1/2014

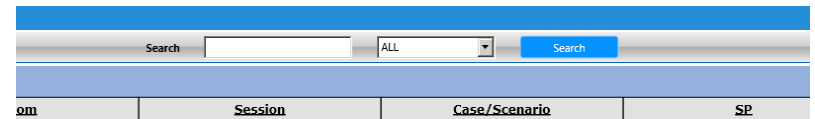

Instead of From ~~1/1/2014~~ to ~~1/10/2014~~

You may enter in a **Keyword** (last name for your search if video is indexed) and click '**Search**'; this will include any videos with the keywords as well as other videos.

2) The **top search bar** will only find videos listed in the table below.

\*If you cannot find your video using the top search bar, narrow your search in the **Search tab on the left**.

3) Click on the date and time to play the video

<input type="checkbox"/>	<a href="#">4/1/2014 8:59:23 AM</a>	NORTH 4		
<input type="checkbox"/>	<a href="#">4/1/2014 8:49:17 AM</a>	NORTH 4		

\*\* Only 500 Videos will appear at a time.

\*\* Searches can be partial, entering just 'z' will include all words with the letter 'z' in the results.
