OBGYN In-situ PPE training for Ebola Readiness

On October 30, 2014, attending physicians from the Department of Obstetrics and Gynecology at NYU Langone Medical Center underwent in-situ training on personal protective equipment (PPE). Led by NYU's department of Infection Control with assistance from NYSIM fellow Kristen Uquillas, the attending's practiced donning of doffing of PPE in preparation for management of pregnant patients with suspected or confirmed Ebola Virus Disease (EVD). The training occurred on site on the 15th floor MICU at NYU Langone Medical Center so that providers could experience how PPE will work in the actual clinical environment. Those who have gained PPE competency will represent the core team of obstetrical physicians and nurses who will be providing care for these patients.
