

## Exceptional Training Makes all the Difference

### Premature Anne<sup>™</sup>

Premature Anne<sup>™</sup> is a realistically proportioned 25-week preterm infant manikin developed in collaboration with the American Academy of Pediatrics. Premature Anne is designed to facilitate training of healthcare professionals in proper care and resuscitation techniques for preterm infants.

Preterm infants are at greater risk and require specialized care by a highly skilled team of health professionals. Premature Anne is designed to meet the specific Neonatal Resuscitation Program<sup>®</sup> training requirements, defined by the American Academy of Pediatrics, to help ensure better patient outcomes for the most vulnerable of babies.

# Premature Anne™
