Frank and Sarah Olson Visiting Professors and Grand Rounds Series in Simulation Education:

Dr. Stanley J. Hamstra, Ph.D.
VP, Milestone Research and Evaluation
Accreditation Council for Graduate Medical Education
515 N. State Street, Suite 2000
Chicago, IL 60654

**Monday, September 28, 2015**

**Location(s):**
NYSIM
462 First Avenue - Bellevue Hospital (Cross Street @ 28th Street)
3rd Floor, D elevators
New York, NY 10016

2:00PM – 4:00PM Workshop: Using Simulation to Enhance Medical Education in an Era of Competencies and Milestones
This presentation will identify likely future directions for the field of simulation-based medical education and promising areas for scholarship. Examples of research will be presented to illustrate how to address major themes in medical education using simulation.

*Light snacks and refreshments will be served.*

5:00PM – 6:00PM Grand Rounds: The Natural History of Simulation Centers: Evolution, Establishment, and Scholarship
Over the course of his career, Dr. Hamstra witnessed the design, construction and evolution of several simulation centers. Much of his work has involved the management of research in simulation centers while at the same time supporting clinical faculty in pursuing academic scholarship and educational credentials. This talk will present a critical examination of simulation centers as they evolve from initial design through to establishment and stability (either as sustainable growth or underutilization). Dr. Hamstra will examine the role of scholarship in addressing the local accountability mandate, and present a framework for sustainability based on scholarship.

*Dinner and refreshments will be served.*

If you are interesting in attending one or both workshops kindly RSVP at [NYSIM@NYUMC.org](mailto:NYSIM@NYUMC.org)

Biography—Dr. Stanley J. Hamstra

Dr. Hamstra is currently VP Milestones Research and Evaluation at the ACGME, which sets accreditation standards and accredits over 9000 residency training programs in the US across more than 140 medical specialties. Prior to this, he was Director of the Academy for Innovation in Medical Education (AIME) at the Faculty of Medicine, University of Ottawa, and Research Director of the University of Ottawa Skills and Simulation Centre. He has developed numerous programs to support scholarship and innovation in health professions education, including a Healthcare Education Scholars Program. Professor Hamstra is founding editor of the Springer Book Series “Advances in Medical Education”, and is a past member of the Education Committee of the Royal College of Physicians and Surgeons of Canada. His research addresses the validity of competency assessments for medical residents, as well as the effectiveness of simulation for teaching and assessment. He has had previous faculty appointments at the University of Michigan Medical School (2005-2009) and the Department of Surgery at the University of Toronto (1997-2005).
